[Water Supply And Sanitary Engineering By G.s. Birdie Pdf Free 80](#)

Form the 10th year plan (Table 6.2), although the achievement percentage in sanitation at the end of 10th year plan is 45.8 percentage but there is not any expenditure either for rehabilitation of existing sewerage treatment plant in Kathmandu valley or new construction of sewerage treatment plant .So from the target and achievement table, the achievement percentage 45.8 is only for the construction of toilet in the household and limited sewerage line construction (NPC,2007) but it does not address about the wastewater treatment plant.

As regarding the budget allocation (Table 6.3) about 94 % of budgetary money is planning to invest in the drinking water supply sector and hardly 6 % is in the sector of sanitation distribution but among the 6 percentage there is not clear, how much amount will be expended for wastewater treatment system in the year of 2007-2008, Although it was announced that we are going to celebrate sanitation year in 2008 to know the stage of millennium development goals (MDGs).

The policies and commitment of the Government of Nepal have resulted in becoming a priority of multilateral aid agencies like the World Bank, Asian Development Bank (ADB), bilateral-assisted projects as well as international/ non-governmental organisations (I/NGOs) working in this field. In this regard, it is important to note that various approaches are being adopted by organisations working in this sector, but the goal is the same safe water and sanitation, but in practice overwhelming concern for maximum coverage and not quality. (Devkota, 2008)

Regarding this problem, as asked in related questions to the general secretary of MPPW, he agreed with the situation and replied that MPPW has big problems in funding. A huge amount of budgetary money has to be expended for security purposes to solve the political conflict on the one hand and on the other hand their first target is in drinking water supply and secondly that every household should have toilet. Less priority is given to the issue of wastewater treatment plants. That is one of the reasons that BASP has been receiving less of the annual budget for its operation and maintenance from the MPPW.

6.1.5 Opinions of key Informant on the Rules and Regulations for Wastewater Treatment Plants

Table 6.4 Rules and Regulations in wwt

| [Redacted Header] | | | |
|---|---|---|--|
| Which organization is responsible for setting quality for wastewater in Kathmandu Valley? | MOPE,MOI and Concern Wastewater treatment plant | MOPE, MOI and Concern Wastewater treatment plants | |
| Do you have any Sanitation Act? | Not yet | Not yet | There is only Draft of Sanitation Act but not legalize yet. |
| Do you agree with the statement that : In Kathmandu valley, more propriety is given to drinking water and less in wastewater treatment plant? | Yes * | Yes | *government has given first priority to the drinking water and second on site sanitation |
